--	--------------------

**\*Winter Quarter Average**

The winter quarter average is calculated based on the average water usage in the months of December, January, and February (as reflected in the January, February, and March utility bills).

**Interim Average**

For customers who move or relocate during the winter quarter average period, an interim average will be used. The interim average is the average of all residential winter quarter averages and is recalculated each year.

*For the period June 2025 - May 2026, the interim average is 4,453 gallons.*
