

SECTION 025414
AGGREGATE FOR SURFACE TREATMENT

1. DESCRIPTION

This specification establishes the requirements for surface aggregate to be used in the construction of surface treatments and seal coats. The type, grade, and surface aggregate classification (SAC) of aggregate shall be as specified in the applicable specification or as shown on the drawings.

2. AGGREGATE

- A. Materials. Furnish uncontaminated materials of uniform quality throughout that meet the requirements of the drawings and specifications. Materials shall meet the applicable requirements of TxDOT Specification Item 302 “Aggregates for Surface Treatments” (latest edition).

3. MEASUREMENT AND PAYMENT

Unless otherwise specified on the Bid Form, aggregate for surface treatment and seal coats shall not be measured and paid separately, but shall be subsidiary to the construction in which these materials are used.
